

**Egbe Hospital
Revitalization
Project**

Missionaries Needed at Egbe Hospital, Nigeria, West Africa

Do you have a passion for cross-cultural ministry? *If you're looking to serve in a short-term assignment or a long-term placement, Egbe Hospital has several opportunities available for qualified candidates.*

Founded 63 years ago, Egbe Hospital is a resource for doctors and nurses in training, a haven for healing the sick, and a mission field for sharing the Gospel of Jesus Christ.

Missionaries will serve alongside the hospital leadership and Revitalization Project team on the 33 acre hospital compound comprised of 3 operating rooms, 3 wards, an eye care center, an HIV/AIDS center, a maternity, a school of nursing and midwifery, and a family medicine residency program.

Missionary Consultant Opportunities:

Medical Director

The Medical Director, working alongside a Nigerian counterpart, will oversee all medical staff activities of the hospital, assist with upgrading medical equipment, provide training and staff development, and

establish best practices for patient care programs. This is an excellent opportunity for a seasoned physician to mentor Nigeria's leading physicians through the Family Medicine Residency Program, work with multiple partners and stakeholders toward sustainability, and develop partnerships and training opportunities with other teaching facilities.

Director of Administration (Hospital Administrator)

Working with the Medical Director, the Director of Administration will perform a "general manager" role, responsible for the day to day operating and administrative activities working

closely with the heads of departments. The position is one of problem solving in all areas of seasoned doctor with a gift for leadership and teaching to have an impact on training and the organization, with emphasis on building a culture focused on developing and document best practices and systems that produce an efficient and patient focused environment resulting in a hospital bearing an exceptional Christian reputation for good medical care.

General Surgeon

A General Surgeon is needed to perform surgery alongside Nigerian physicians in training; coordinating surgery services, including planning, scheduling and determination of procedures; providing consultation and instruction in preoperative and postoperative treatments and procedures; and managing surgical patients. The General Surgeon will also participate in recruitment of operating theatre staff and Nigerian surgeons.

Head Nurse

The Head Nurse will work alongside the Nursing Director to help with system improvement in the areas of patient care and policy and procedure development. The Head Nurse will also be involved in recruitment of nurses, teaching and training the hospital staff, performing clinical work and possible supplemental classroom teaching in the Schools of Nursing and Midwifery.

Physicians

Physicians with experience in Family Medicine, Medicine, Internal Medicine, Pediatrics, and OB-GYN are needed to support the clinical and academic load.

Nurses

Nurses with the following specialties are needed to support the nursing staff: registered nurse practitioner, operating room nurse, emergency room nurse, nurse anesthetist, optical/ophthalmologist nurse.

Ophthalmologist

The hospital runs an Eye Center with a dedicated operating room and examination rooms. The Center offers consultation services, surgical, eye screening and outreach services, and lens implants. The Ophthalmologist will assist in overseeing and upgrading the Eye Center; giving guidance on improvement of eye care delivery, assessing equipment requirements and maintenance; provide instruction and evaluation to staff; monitor outreach service; and help recruit Nigerian optometrist and ophthalmologist.

Dentist

The hospital is looking to open a dental facility in 2015/16. Opportunities are available for a dentist who desires being involved from inception or once the unit is completely set up.
